Subject Archived Sites - 5 Yr. No Action Site List

It has been determined that the following site(s) have been approved for Archiving by the Site Assessment Program. This decision is based on a data-cleanup initiated by the Site Assessment Program and approved by the CERCLIS Data Quality Coordinator in response to the HQ's SA Effects Data Quality Report.

The sites were identified under the GPRA-related data discrepancy "5-Year No Action Sites." This email serves as final site dispensation for the SiteFile/Records Renter.

We will be submitting copies of this email attached to the individual site file update forms for placement in the Site Files, Folder 1a in the Records Center.

Subject Archived Sites - 5 Yr. No Action Site List

Hi Charlene,

As we discussed on 3/7, I have reviewed the final list of **5-Year No Action Sites** (see below) and determined that **76** of the sites listed can be Archived.

This decision is based on a review of all CERCLIS site schedules and activity along with review and confirmation from Laura Janson that there are no outstanding or planned enforcement activities at these sites. In lieu of requiring that the SAM's complete individual SA Data Entry Forms for each of the 76 sites, I can prepare a cover memo to the site files re-stating the information above for both Charlene's signature and my signature as the CERCLIS Data Quality Coordinator and we will forward the copies of the memo with the list of sites to the Record Center. Given the number of sites addressed, this is an acceptable reporting format.

Thank you for your continued cooperation and special thanks to Anita for her assistance in tracking down this information and the SAM's for addressing these data cleanup issues!

All of the sites on the list will be Archived on **3/8/07** except for the following:

**Open Enforcement Actions:**

Glenside Mercury  
Peninsula Plating  
O'Brien Machinery

ORIGINAL

**Open Removal Assessments & Lab Support Actions:**

Keystone Ordnance Pumping Station

American Christian Mercury

East Albert Street

Vermiculite HWR2 (Check with Steve Jarvela for completion dates on the Vermiculite sites, they may be able to do an email to the site file as a closeout)

Vermiculite TOR1

**Open Expanded Site Inspection:**

Scovitch Property (I believe this can be closed-out with an in-house file review since all other actions have been NFRAP'd)
